Communication Skills

Experience with Design Systems

### Tools

Figma

HTML5, CSS3, JS

Python

Blender (Beg - Int level)

Spark AR

### Languages

English (Fluent)

Romanian (Advanced)

## Work Experience

### Creatopy | UX/UI Designer

Mar 2021 - Mar 2022

I worked on new and existing features in collaboration with developers to ensure the success of the feature and to improve our users' experience. I collaborated with our research team to discover user pain points and solve them. I crafted our onboarding experience, have appeared in multiple videos for the company, and have recorded voiceovers as well.

### Flex | UX/UI Designer (Capstone Student Project)

Jan 2021 - Apr 2021, Brantford Ontario

My teammate and I partnered with Deloitte Digital to create a solution to solve some of the struggles of working from home. I conducted user interviews to better understand the problem space, and after initial research I created wireframes, low to high fidelity mockups, and a final animated design. Usability tests were run throughout. The project was voted best in our class by a panel of judges and we won \$3,000!

### Bookable | UX/UI Designer (Student Project)

Spring 2020, Brantford Ontario

A three-person project turned potential startup. I Conducted usability tests and turned those findings into high-fidelity animated prototypes. Our work got accepted into the university startup program.

## Awards & Certifications

### Scotiabank UX Capstone 1st Place

April 2021, Brantford Ontario

### Scotiabank \$5,000 UXD Scholarship

Nov 2020, Brantford Ontario
